Liss McCabe
Software Engineer

📞 971-280-1480   ⬡ /dysnomian   ✉ liss@eristiccode.com

Experienced Software Engineer with a strong background in web development and a passion for driving growth, seeking to contribute my expertise to a committed team.

💼 Professional Experience

Kajabi   2022 – 2023
Software Engineer   *San Francisco (Remote)*
» Rails, React, Storybook, Figma, Sass
› Worked extensively in React. Worked with designers to build effective and attractive dashboard and onboarding components.
› Designed a marketing feature reaching across the stack to better utilize the high traffic dashboard.

Lob   2021 – 2022
Software Engineer   *San Francisco (Remote)*
» Vue.js, Node, Tailwind, Storybook
› Wrote Vue.js components to build an entirely new and redesigned dashboard, making the API-first product available to non-technical users.
› Worked with designers to implement new and redesigned components, including writing Storybook documentation.
› Wrote endpoints and customer input validation for the Node backend in support of a major feature to enable campaign creation by non-technical users.

Cloud City Development   2020 – 2021
Senior Software Engineer   *San Francisco (Remote)*
» Rails, React, Figma, Sketch, Terraform
› Built a user-facing Rails/React/Bootstrap app to help developing countries apply for pandemic preparedness funds.
› Worked with multiple clients implementing mockups from Figma and Sketch.
› Implemented Rails APIs, defined, coordinated, and tested via Postman.
› Built and maintained AWS configurations via Terraform. Configured multiple CI environments using Semaphore, TravisCI and circleci.

New Relic   2016 – 2019
Software Engineer   *Portland, OR*
» Rails, Ruby, Elixir, Terraform, Jenkins, Groovy, Incident Management
› Handled incident management, internal customer support, and general ecosystem wrangling for APM, New Relic's largest product. Ran regular game days. Led team disaster recovery project to ensure business continuity.
› Containerized APM and migrated it to a Mesos-based cloud infrastructure, decommissioning a fleet of bare metal servers and allowing more resilient deploy and canary processes. Handled Jenkins deployment pipeline, CI tools, and development and staging environments for APM, ensuring smooth operation of the critical APM ecosystem.

Quick Left   2014 – 2015
Junior Software Engineer   *Portland, OR*
» Rails, Angular
› Revamped a Rails app that interfaced with Twilio to enable SMS hospital service coordination in remote areas of the Amazon.
› Converted a legacy Javascript frontend to Angular.

Collective Bias   2014 – 2015
Junior Software Engineer   *Fayetteville, AR*
» Rails, Elasticsearch
› Shipped a major user account creation feature, automating an oversight-intensive process. Migrated an API stream to Elasticsearch to scale for large volumes of data. Prototyped microservices using Redis Pub/Sub to streamline the deploy process.
› Restored an abandoned test suite and moved to CI to accelerate development. Extensively refactored a legacy app while increasing velocity and adding numerous features. Built a Vagrant development environment to simplify a complex application setup.

Acumen Brands   2013 – 2014
Junior Software Engineer   *Fayetteville, AR*
» Rails, Redis

Liss McCabe
Software Engineer

971-280-1480   /dysnomian   liss@eristiccode.com

> Moved store search from Thinking Sphinx to Swiftype, a SaaS Elasticsearch implementation, to improve user experience. Integrated accounts with an analytics service for immediate improvements in DTC advertising. Wrote copious shell scripts for data fixes.
> Using Redis sets and hundreds of thousands of purchase order records, correlated delayed shipments with customer orders to email customers about delays.

Aurora Imaging Technology   2008 – 2013
Research Associate   *Fayetteville, AR*

» PHP, Final Cut Pro

> Developed a PHP data entry app for collecting and validating cases in support of a 1200 patient research project. Handled compliance for multiple research projects. Produced videos for physician education.

🎓 Education

University of Central Arkansas   2001 – 2006
B.A. Writing   *Conway, AR*

Acumen Brands   2013
Web Developer Apprenticeship Program   *Fayetteville, AR*

⚙ Skills

Frontend   React, Vue.js, Storybook, Sass
Backend   Rails, Elixir, Node
Languages Ruby, Javascript, Elixir
Other   Git, AWS, Docker, Figma, Sketch, Terraform, Postgres, Redis

🎤 Presentations

Speaker: "Code Archaeology"   2017
> Open Source Bridge, Portland, OR
